Product Code: 54001
Product Name: Neosilk® Human-Type Collagen I

Product Overview

Product Code	54001
Product Name	Neosilk® Human-Type Collagen I
Maker Name	Immuno-Biological Laboratories Co., Ltd.
Intended Use	Cosmetic Material
Storage Condition	2~8 ºC
Poisonous and Deleterious Substances	Not Applicable
Cartagena	Not Applicable
Package Form	Lyophilized product in deionized water. No additives.
Package Size1	100 mg
Price	On Request
Shelf Life	5 years stored at 2~8 ºC for unopened lyophilized product upon production. Should be immediately used after reconstitution (not re-use).

Product Description

Neosilk® Human-Type Collagen I is a recombinant protein produced by expressing a full-length triple-helical domain of human type I collagen α1 (I) chain in transgenic silkworms (ref.1, 2). Since Neosilk® Human-Type Collagen I is purified from cocoons of transgenic silkworms, the collagen contains no animal-derived materials. This product is completely free from artificial preservatives.
