Unique & Niche,
Antibody & ELISA

Immuno-Biological Laboratories Co., Ltd. (IBL)

For Global Life Bioscience Supply Valuable Antibodies

Immuno-Biological Laboratories Co., Ltd. (IBL) is a Japanese antibody developer who supplies their own developed and manufactured antibodies and ELISA products worldwide. The company founder and the corporate president of IBL, Mr. Tsutomu Seito, is one of the pioneers of monoclonal antibodies.

Mr. Seito's spirit and passion *"Supplying valuable antibodies to save people fighting against diseases all over the world."* are reflected in our services and products as our corporate philosophy since the establishment of the company.

Challenging for Innovation

IBL has always been striving for innovation in technology while maintaining traditional antibody development techniques. We have been continuously investing in a novel transgenic silkworm protein production system and aiming for developing and manufacturing drugs and testing products using this technology.

Japan Quality

IBL has maintained ISO13485 certification since 2009. All our antibodies and ELISA products are manufactured and controlled in-house at our head office and main laboratory located in Japan. We are proud and confident in the quality of our products and services.

IBL carefully conducts all processes of antibody development with the utmost attention to the process of selecting sequence, immunization, screening, and cloning to find the best antibodies for a particular purpose. Our mission is to consistently supply quality products that are both highly specific and sensitive.

ELISA

Reliable Quality

- Consistency & Accuracy
- Stable Supply
- Professional Support

Antibody

In-house Development & Control

- Select Sequence
- Strive for Specificity
- Production / QC

IBL Brand

500

We have unique **in-house developed products** that are supplied worldwide. The total number of IBL brand products is around 500 which consists of over 120 ELISA products and 350 antibodies.

History of IBL

1982

IBL has been refining its skills and the quality of antibody development over decades since the company was established in 1982. The total number of antigens used for antibody development is **over 5,000** and we have also provided **more than 10,000** contract services in Japan.

Global Supply Network

80

IBL has an extensive global supply network through valued international distributors in major markets so that we are capable of supplying our products in **around 80 countries**.

Diabetes, Hyperlipidemia,
Cardiovascular Events, etc.
Glucose / Lipid Metabolism

Alzheimer's disease (AD) etc.
Aging, Neurodegenerative

CKD, AKI, IgA Nephropathy (IgAN),
Hypertension, etc.
Kidney Diseases

Cancers, Arthritis, Hepatitis, etc.
Inflammatory Diseases
